

Perfion Supplier Portal

Streamlining Collaboration with Suppliers

Effortlessly manage your supplier relationships and product data through the Perfion Supplier Portal. This comprehensive platform facilitates seamless communication and data exchange between your organization and suppliers, ensuring a centralized and efficient process.

How it works

Key features

Streamlined Product Upload: Suppliers can effortlessly upload selected products or entire catalogs through various methods, including manual data entry, file imports, and fully automated integrations with supplier data feeds.

Automatic Data Validation: Ensure data compliance with internal rules through automated validation, covering mandatory fields, data types, text formats, number ranges, and more.

Integrated Digital Asset Management: The portal supports the easy handling of digital assets. Suppliers can upload product images and files, enhancing the overall product information.

Data Transformations: Automated integrations include data transformations, such as merging data fields, trimming texts, unit conversions, and more, ensuring consistency and accuracy.

Efficient Product Approval Workflow: Perfion owners can accept or reject products from supplier catalogs. Acceptance can be automated for selected suppliers, while rejected products remain in the portal for easy subsequent acceptance.

Seamless Product Integration: Accepted supplier products are seamlessly integrated into Perfion as internal products, ready for further enrichment. Perfion products are intelligently linked to supplier products for comprehensive management.

Flexible Data Update Handling: Easily accept or reject subsequent supplier data updates in bulk or at the product level. Automation options are available for trusted suppliers and specific attributes.

**Enhance Collaboration,
Ensure Accuracy**

The Perfion Supplier Portal stands as a pivotal asset, fortifying collaboration and ensuring data accuracy in your supply chain management. Serving as a centralized hub for seamless interaction with suppliers, the portal streamlines communication, expedites approval workflows, and minimizes the risk of errors.

Suppliers benefit from a user-friendly interface supporting various data upload methods, from manual entry to fully automated integrations. The portal's data validation features guarantees compliance with internal rules, contributing to a reliable and accurate database. Additionally, its integrated digital asset management empowers suppliers to enhance product information with ease, uploading images and files effortlessly.

Industry leading solution provider

Boyum IT Solutions is an award-winning development house that started in the SAP ecosystem and now has over 25 years of ERP experience and customers in 130 different countries. Around the world, our 600 partners work together to provide all users with the best tools to optimize their system and make it a smooth and seamless platform. Our vision at Boyum IT is to inspire companies to achieve sustainable growth and competitive advantage. Now and in the future!
